## What helps your mental health

### Practice Mindfulness:

Quiet your mind and thoughts in a calm environment. Focus on your surroundings and stay in the present.

### Physical Activity:

Include a favorite physical activity in your daily routine to improve your sense of well-being and relieve stress.

### Breathing Exercises:

Calm your mind with breath. Try 4-7-8 breathing. Breathe in 4 seconds, hold for 7 seconds, and exhale for 8 seconds.

### Grounding Skills:

Find five things you can see, four things you can touch, three things you can hear, two things you can smell, and one thing you can taste.

### Journaling:

Write down thoughts and experiences to help your mind process and make sense of them.

### Self-Compassion:

Self-compassion is the ability to treat yourself with kindness and understanding, like you would treat a dear friend.

### Connect With Others:

Spend time with friends and loved ones or seek therapy.

## What doesn't help your mental health

- Avoidance and procrastination
- Substance abuse, self-medicating with substances, or other unhealthy habits
- Violence and abuse
- Hurting yourself or others
- Disconnecting from your thoughts and emotions
- Thinking about the worst-case scenario
- Isolating yourself from your support system
- Not talking about it with a trusted adult
